MEET THE LABORATORY

Oral Arts Dental Laboratory

HUNTSVILLE, ALABAMA

Tiffany Marshall, Production Manager and Matt Winstead, CDT and Vice President

Technology First: *Oral Arts Is an Innovative Leader*

Oral Arts Dental Laboratory, founded in 1970 by Thomas Winstead, is a family-owned, full-service dental lab headquartered in Huntsville, AL. With a mission to produce high-quality restorations using the latest technology, Oral Arts is considered an innovative leader among today's dental labs.

Technology such as CAD/CAM manufacturing, model-less dentistry, and 3D printing places Oral Arts on the forefront of digital advancements, which improves the efficiency, accuracy, and predictability of the final product. The 253 employees embody experience, artistry, and a passion for the dental industry, which is evident in the exceptional and consistent work produced.

WHY CHOOSE ORAL ARTS?

- All products are made in the USA, guaranteed
- Local pickup and delivery
- Highly qualified and certified technicians
- 5 days or fewer turnaround time
- Full-service capability
- Advanced technology and digital manufacturing
- Use of a 3-stage quality assurance system
- Free shipping both ways

SERVICE

Dentists and patients alike deserve restorations created in a safe, clean environment. This is guaranteed because all products are made in the United States using only FDA-approved materials. Oral Arts is a Certified Dental Laboratory, meeting the requirements of the National Board for Certification.

The adoption of CAD/CAM technology brings many benefits to the lab's customers. Precision-milled titanium implant bars for implant-supported dentures provide a high-end prosthesis with superb fit, biocompatibility, and strength. CAD/CAM zirconia or titanium custom implant abutments are provided at a low cost in a predictable package price, including tissue models, parts, and final crowns.

ORAL ARTS IS DETERMINED TO PROVIDE THE HIGHEST QUALITY PRODUCTS AVAILABLE AS THE DENTAL INDUSTRY EVOLVES INTO A SEAMLESS DIGITAL WORKFLOW.

Oral Arts provides advanced material options such as monolithic BruxZir Solid Zirconia crowns and IPS e.max restora-

Before: Severe wear from bruxism.

After: IPS e.max on teeth Nos. 5-12 and BruxZir Solid Zirconia on teeth Nos. 2-4 and 13-15.

Dentistry courtesy of Dr. Samuel L. Corey, Fort Wayne, IN. Restorations courtesy of Oral Arts Dental Laboratories.

tions as well as CAD/CAM PFM and full gold crowns. By using digital technology for all fixed restorations, dentists receive consistency of fit, contacts, occlusion, and anatomy. Diagnostic study models and esthetic wax-ups are digitally scanned and copy milled for predictable outcomes in final ceramic restorations.

Oral Arts also designs model-less crowns on a daily basis and is capable of receiving intraoral scan files from any digital impression scanner. Dentists save \$20 per unit by using a digital impression scanner and a model-less technique via electronic data transfer directly to the laboratory.

COMMUNITY OUTREACH

In addition to providing excellent lab services, Oral Arts has a philanthropic heart,

working to advance dental care to the underserved. Whether partnering with the Community Free Dental Clinic of Huntsville, traveling to Bolivia to increase capacity for the Compassion Student Center in Santa Cruz, or providing ongoing support to numerous dental schools, the Winstead family strives to be servant leaders.

Through visionary leadership and highly trained technicians, Oral Arts is poised to continue as an industry leader in the dental lab sector. Oral Arts is determined to provide the highest quality products available as the dental industry evolves into a seamless digital workflow.

DENTIST TESTIMONIALS

“Oral Arts is a trendsetter in our profession. They are committed to giving dentists the state-of-the-art advancements, which allows us to give our patients the highest quality of care. They understand that technology is the future of our profession.”

GORDON ISBELL, DMD
GADSDEN, AL

“Oral Arts gives us the highest quality consistently. When we seat an Oral Arts crown our patients routinely say, ‘It looks and feels just like my tooth!’ That is the highest compliment we can get.”

MARK MCOMIE, DMD
CHATTANOOGA, TN

“I have been a client of Oral Arts since 1974. With education and innovation, the most modern technology has always been primary at Oral Arts. In addition, they do whatever it takes, including going above and beyond to make their product correct for our patients.”

DENNIS JONES, DMD
PORT CHARLOTTE, FL
