

Advances in Digital Dentistry

In Association with **Benco Dental**

Thursday, September 13, 2018

PROGRAM DESCRIPTION

Digital dentistry is changing the way general dentists, surgeons, and laboratory technicians interact with one another and plan treatment. Incorporation of CAD/CAM technology for restorative solutions can help deliver natural-looking, esthetic results for patients. Connectivity between current CAD/CAM scanners and intra-oral scanners allows the restorative doctor to take a digital impression, make any occlusal modifications chairside, and send the file to the laboratory to design the restoration. This program will review recent advances in digital technology; the increasing importance of the partnership between the dentist and the lab; the differences between various materials used for copings and abutments; surgical planning software for implant placement and restoration; and the many benefits available to the treatment team when using digital dentistry solutions.

LEARNING OBJECTIVES

- Recognize how to incorporate recent technological advances as part of the treatment plan
- Understand how digital impressions can help create an accurate final restoration
- Understand the materials and processes available for CAD/CAM restorations
- Identify cases where guided surgery planning would be helpful for implant placement

Speaker	Courtney Mosley, Straumann Territory Manager	Subject Code	610
Date	Thursday, September 13, 2018	SAC	Straightforward
Time	4:30 PM – 5:00 PM <i>Registration</i> 5:00 PM – 9:00 PM <i>Program</i> <i>Food will be provided</i>	Type	Lecture
Location	Valley Hill Country Club 8300 Valley Hill Drive Huntsville, AL 35802	CE credit	4.0 Hours
Audience	GP/Prosth, S - OMS, S - Perio, S - Prosth, General Dentist	Tuition	Complimentary
