

Diagnostic Wax-Up Models

4 Day Turn-Around

Diagnostic Wax-ups can become a key tool in your overall case planning and communication. The Diagnostic Wax-up assists in fabricating a smile that assures predictability in the mouth and will show your patients your exact treatment plan and will increase the acceptance rate of your planned treatments. Beyond patient communication, Diagnostic Wax-ups are invaluable for their ability to help when considering bite relations, occlusal schemes and vertical and horizontal planes.

Fabricated by Oral Arts Technicians

Advantages

- Improve case acceptance with patients
- Easily make beautiful chair-side temporaries when used as a putty matrix
- Improve preparation design when using clear thermoformed prep guide
